Nodal Officer Guide

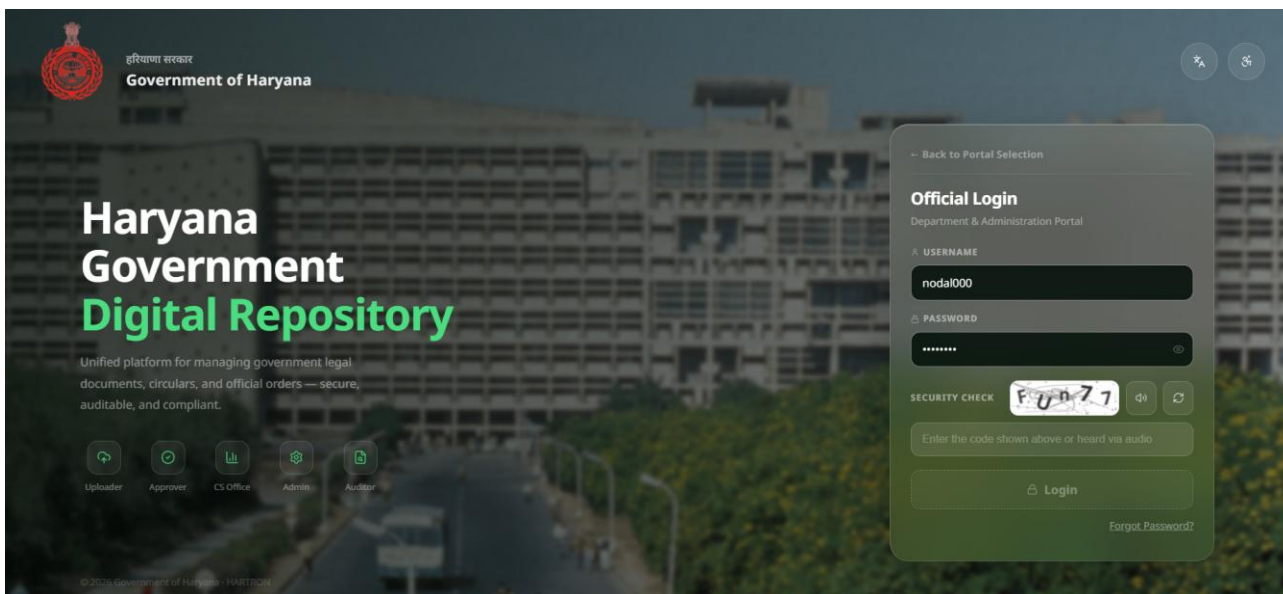

Section 1 — Signing In

1. Login with Credentials

From the portal landing page, choose Official Access, then sign in with a username, password and the on-screen security code — the same flow as Admin, Approver or Uploader. Nodal Officer does not use OTP.

First landing page

Official login page

2. Land on User Management

A successful login opens on User Management. The sidebar has a single group — Administration — with five items: User Management, All Uploads, Linked Documents, Act Parts Review, and MIS Report.

Section 2 — User Management

1. Scoped to your authorized departments

Lists users across every department this Nodal Officer is authorized for. Total Users / Active / Inactive stat cards filter the table the same way as elsewhere: click to narrow, click again to clear.

Chief Minister's Office

User Management.

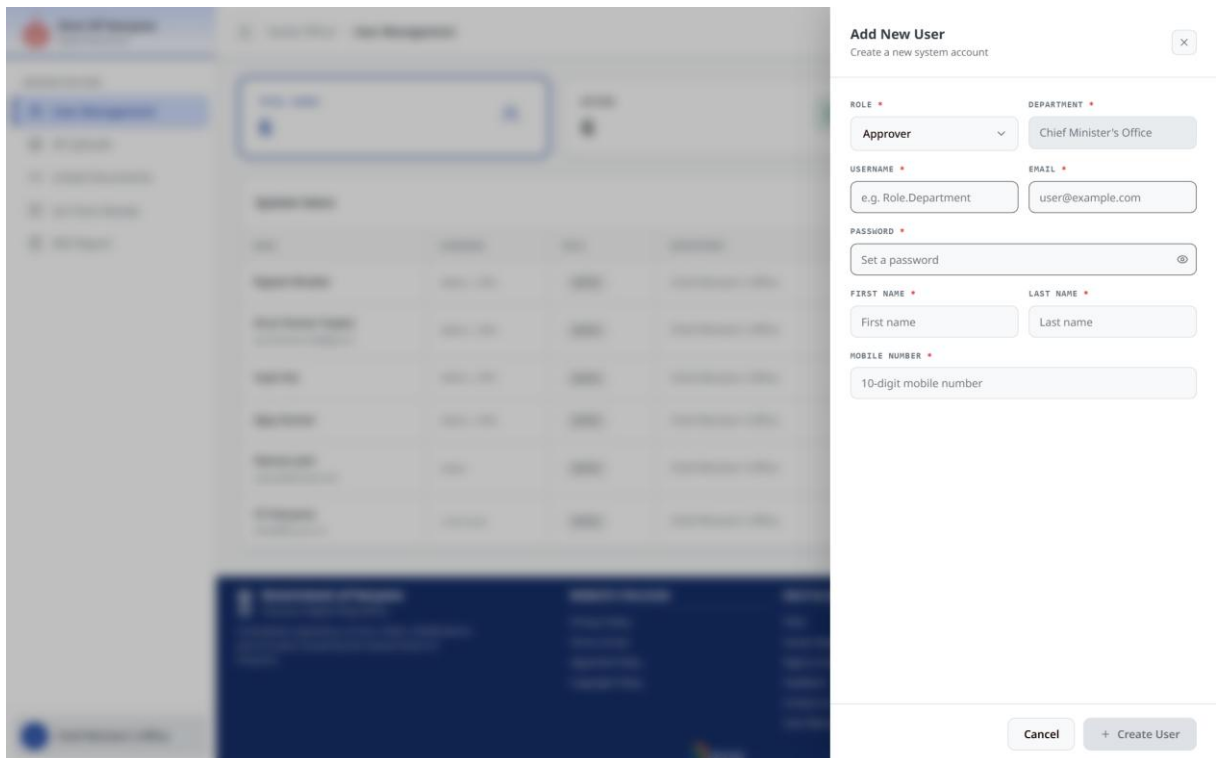

2. Add a new user

Click + Add User. Role comes first — every role is assignable except Admin and Nodal Officer (a Nodal Officer can never create another Nodal Officer or an Admin).

The screenshot shows the 'Add New User' form on the right side of the screen. The 'ROLE' dropdown is set to 'Select Role'. The 'DEPARTMENT' dropdown is set to 'Chief Minister's Office'. The 'USERNAME' field contains 'e.g. Role.Department' and the 'EMAIL' field contains 'user@example.com'. The 'PASSWORD' field is empty with the placeholder 'Set a password'. The 'FIRST NAME' field is empty with the placeholder 'First name' and the 'LAST NAME' field is empty with the placeholder 'Last name'. The 'MOBILE NUMBER' field is empty with the placeholder '10-digit mobile number'. At the bottom right, there are 'Cancel' and '+ Create User' buttons.

Add New User drawer.

The screenshot shows the 'Add New User' form on the right side of the screen. The 'ROLE' dropdown is now set to 'Approver'. The 'DEPARTMENT' dropdown is still set to 'Chief Minister's Office'. The 'USERNAME' field contains 'e.g. Role.Department' and the 'EMAIL' field contains 'user@example.com'. The 'PASSWORD' field is empty with the placeholder 'Set a password'. The 'FIRST NAME' field is empty with the placeholder 'First name' and the 'LAST NAME' field is empty with the placeholder 'Last name'. The 'MOBILE NUMBER' field is empty with the placeholder '10-digit mobile number'. At the bottom right, there are 'Cancel' and '+ Create User' buttons.

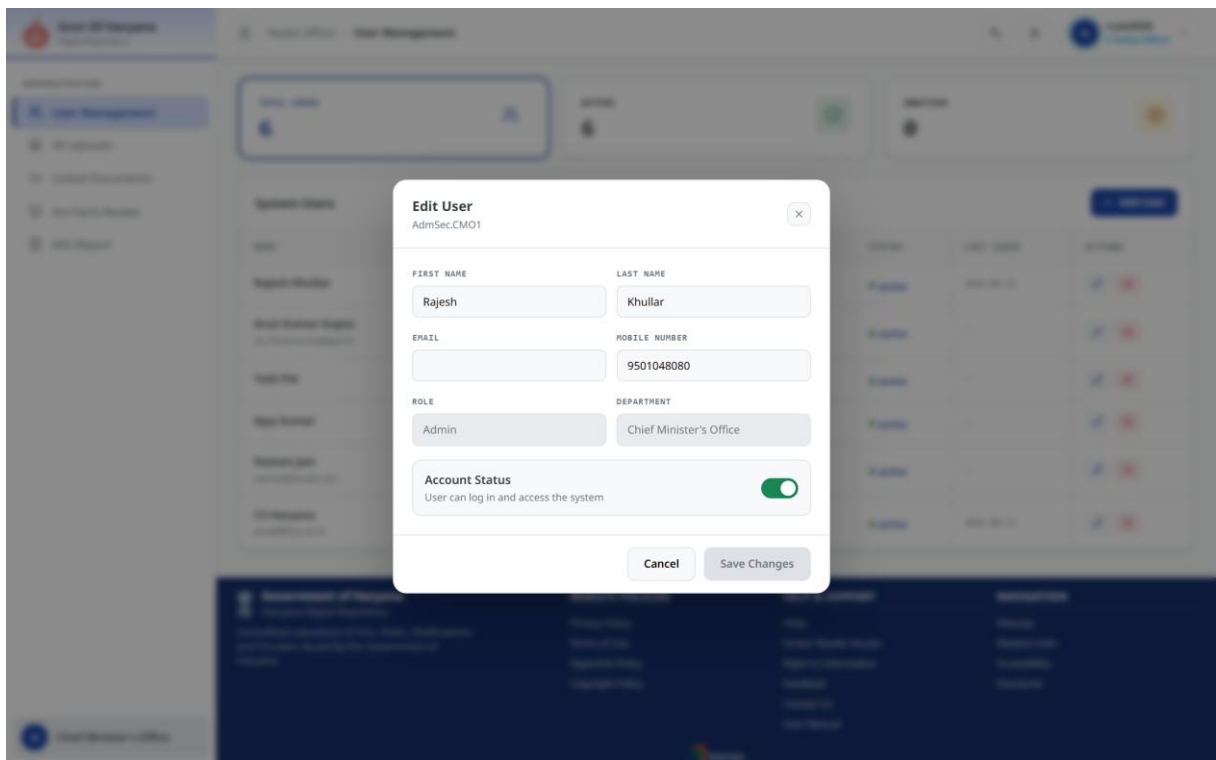

Role set to Approver — Department field locked to Officer's current Department.

Add New User — required fields

Field	Notes
Role	Uploader, Approver
Department	Locked to the officer's first authorized department
Assign Approver	Required only when Role = Uploader
Username / Email / Password / First & Last Name / Mobile Number	All required

3. Edit a user

The pencil icon opens Edit User — name, email and mobile number are editable; Role and Department are locked. The Account Status toggle blocks or restores login access.

Edit User modal.

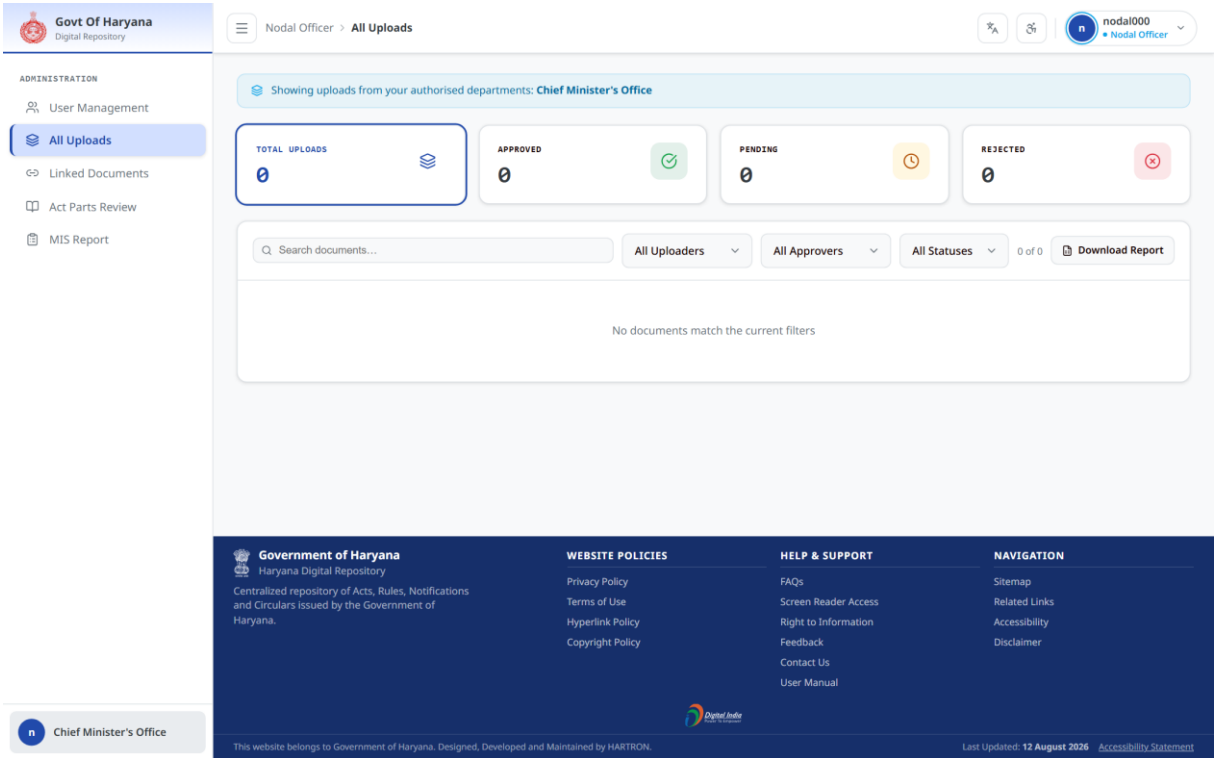

4. Deactivate / activate

The red/green icon on a row opens a confirmation dialog first, then flips the account's status immediately.

Section 3 — All Uploads

1. Every document across your authorized departments

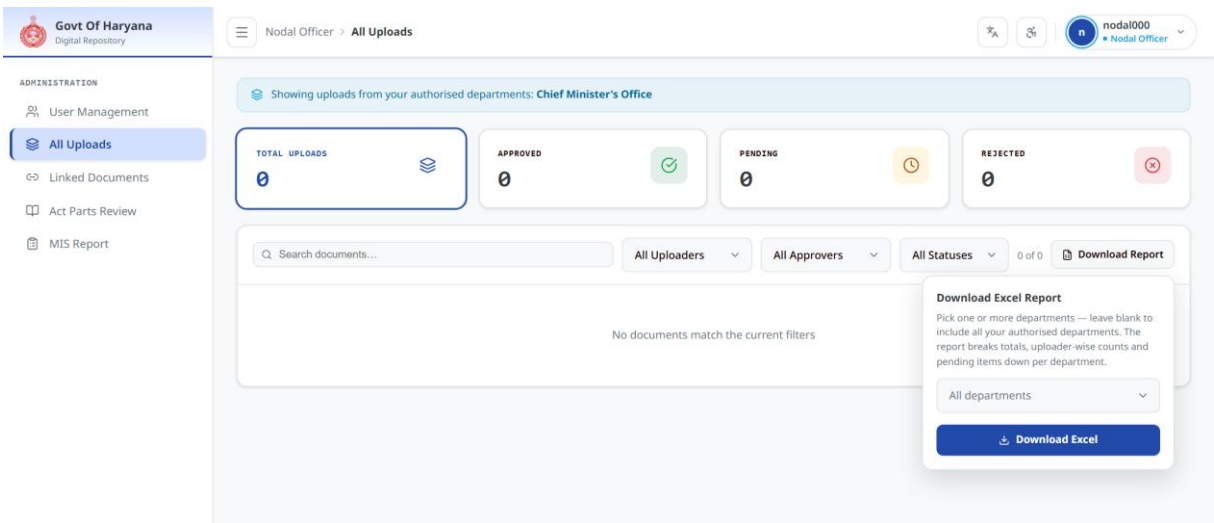

Stat tiles (Total / Approved / Pending / Rejected) and filters (search, uploader, approver, status) to filter data

All Uploads — the blue scope banner names every department included below it.

2. Download Report

Click Download Report to open a small panel: pick one or more of your authorized departments, or leave it blank to include all of them, then Download Excel. The report breaks totals, uploader-wise counts and pending items down per department.

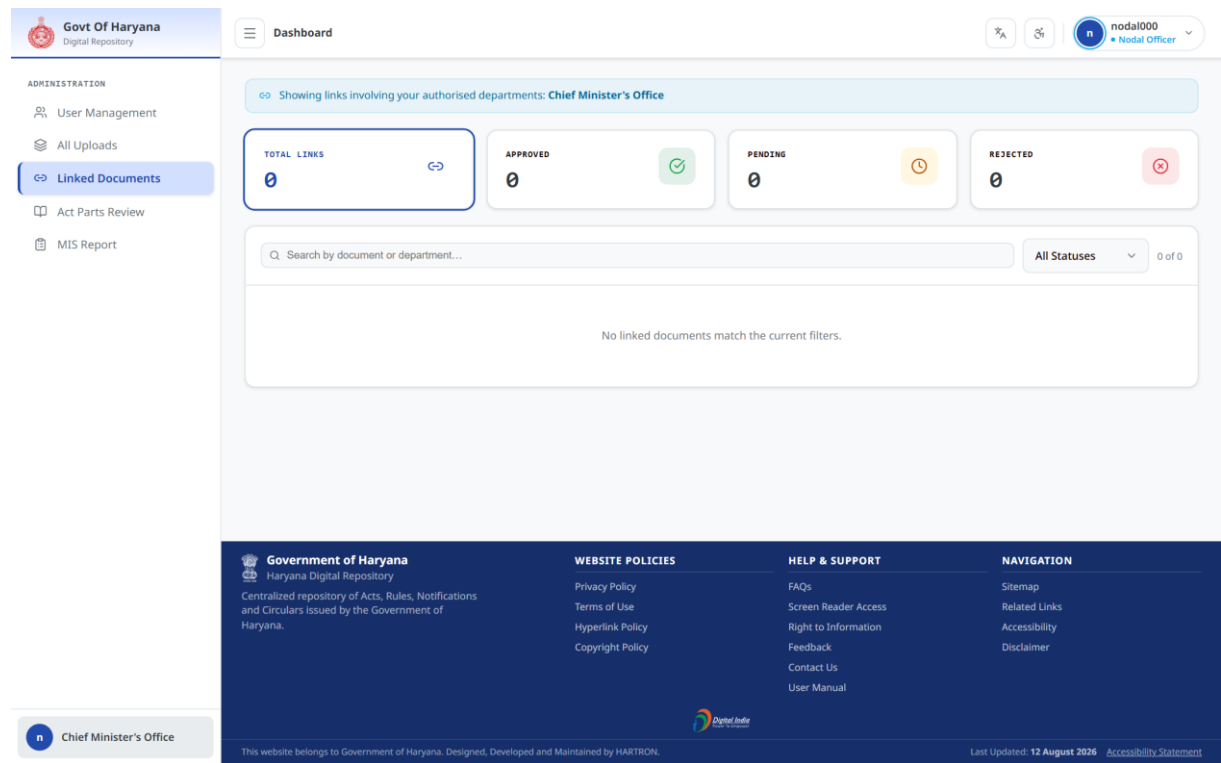

Download Excel Report panel, department multi-select.

Section 4 — Linked Documents

1. Cross- department link requests touching your departments

Lists link requests where at least one of the officer's authorized departments is the source or the destination — a monitoring-only view, same as elsewhere in the app.

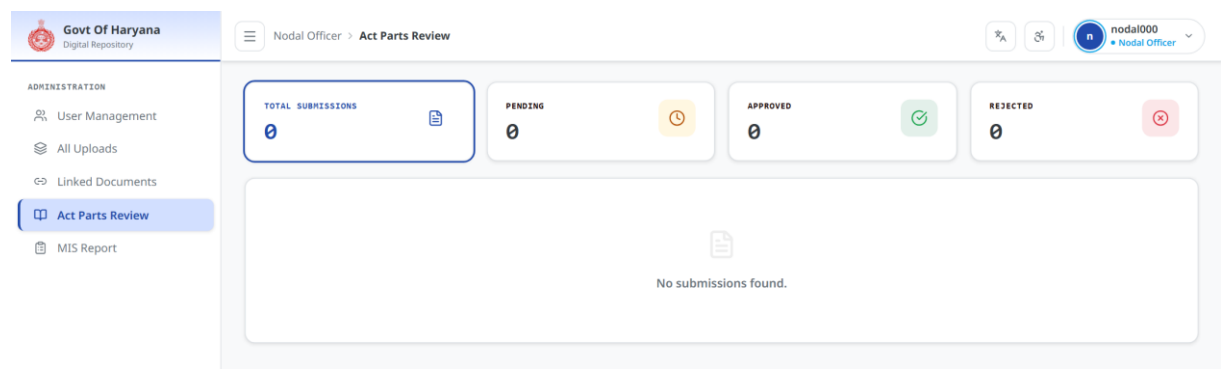

Linked Documents — scope banner at the top.

Section 5 — Act Parts Review

1. Track Act part submissions

A read-only view of Section/Schedule/Annexure/Appendix/Form submissions tied to Acts in the officer's departments. The Total Submissions / Pending / Approved / Rejected cards filter the table; View opens the full submission read-only.

Act Parts Review.

Section 6 — MIS Report

1. Department Audit History

Every create / upload / approve / reject / login action across the officer's authorized departments, with the same search, entity/action/status filters and date range as elsewhere.
