Admin Guide

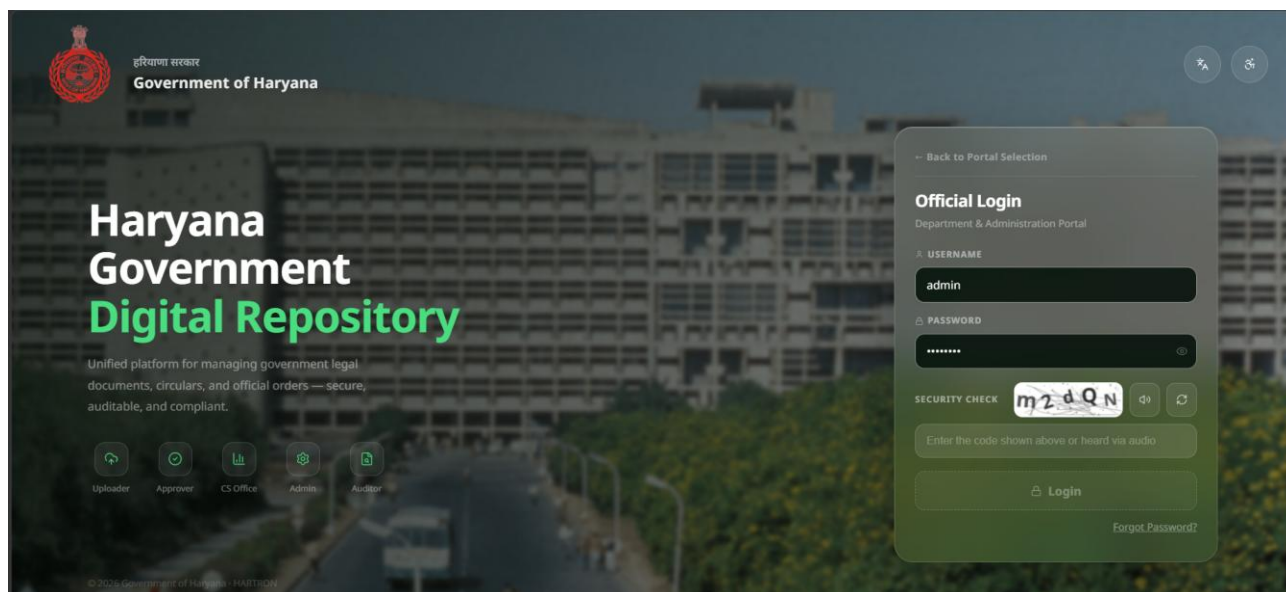

Section 1 — Signing In

1. Login with Credentials

Admin no longer uses OTP — from the portal landing page, choose Official Access, then sign in with a username, password and the on-screen security code, exactly like an Approver or Uploader.

First landing page

Official login page

2. Land on User Management

A successful login opens on User Management: Administration (User Management, All Uploads, Linked Documents) and System (Cap Change Requests, Full MIS Report). Admin can raise Cap Change Requests to increase or decrease maximum number of users per role in their department and this request will be sent to higher hierarchy department for approval. They have rights to approve or reject the request of Admin based in the reason provided.

Section 2 — User Management

1. Scoped to Admin's own department

Lists only the users belonging to Admin's own department — not the whole system. Total Users / Active / Inactive stat cards work the same as elsewhere: click to filter, click again to clear.

Chief Minister's Office

User Management — scoped to Chief Minister's Office only, no department filter dropdown (there's only one to show).

2. Add a new user

Click + Add User. Role comes first — every role is assignable except Admin. Department is shown but locked to Admin's own department, since Admin can't create users anywhere else.

Add New User
Create a new system account

ROLE *
Select Role

DEPARTMENT *
Chief Minister's Office

USERNAME *
e.g. Role.Department

EMAIL *
user@example.com

PASSWORD *
Set a password

FIRST NAME *
First name

LAST NAME *
Last name

MOBILE NUMBER *
10-digit mobile number

Cancel + Create User

Add New User drawer.

Add New User

LAST NAME *
Last name

MOBILE NUMBER *
10-digit mobile number

Cancel + Create User

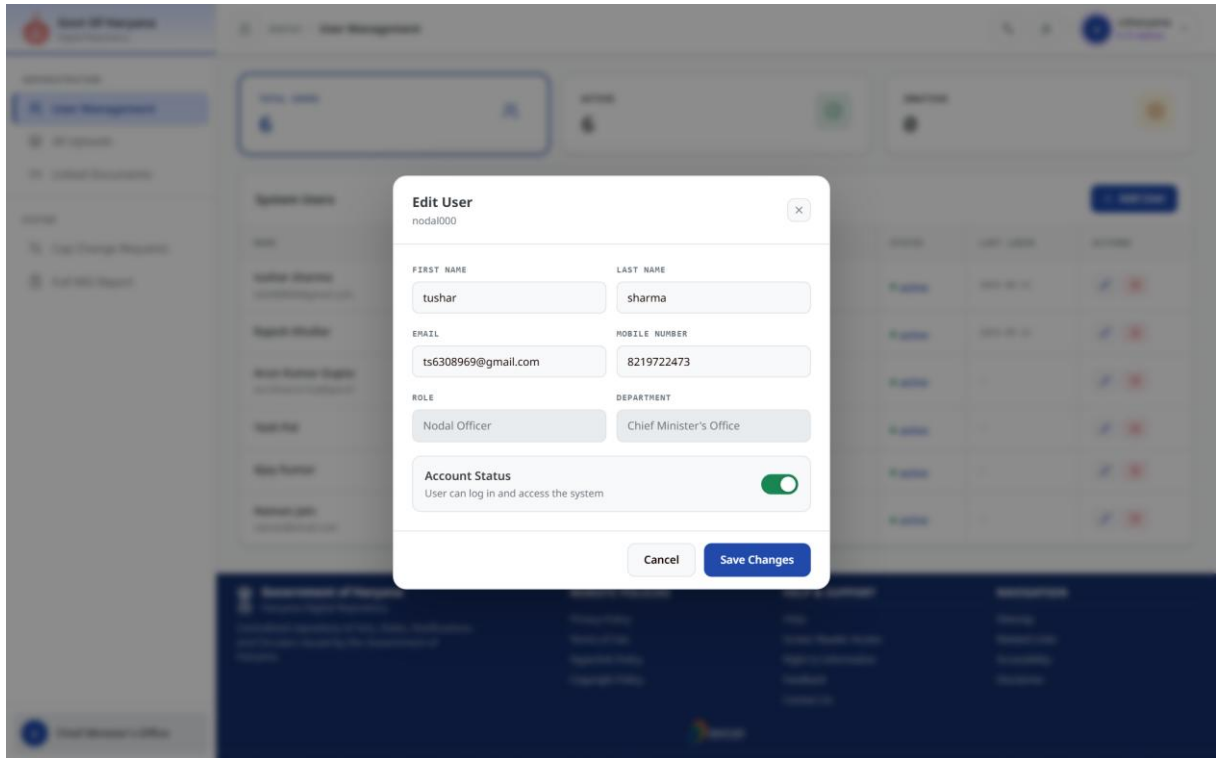

Role set to Approver — Department field greyed out and locked.

Add New User — required fields

Field	Notes
Role	Uploader, Approver, Nodal Officer
Department	Locked to Admin's own department
Assign Approver	Required only when Role = Uploader
Username / Email / Password / First & Last Name / Mobile Number	All required

3. Edit a user

The pencil icon opens Edit User — First/Last Name, Email and Mobile Number can be changed; Role and Department are shown locked. The Account Status toggle blocks or restores login access.

Edit User modal — Role and Department locked, Account Status toggle at the bottom.

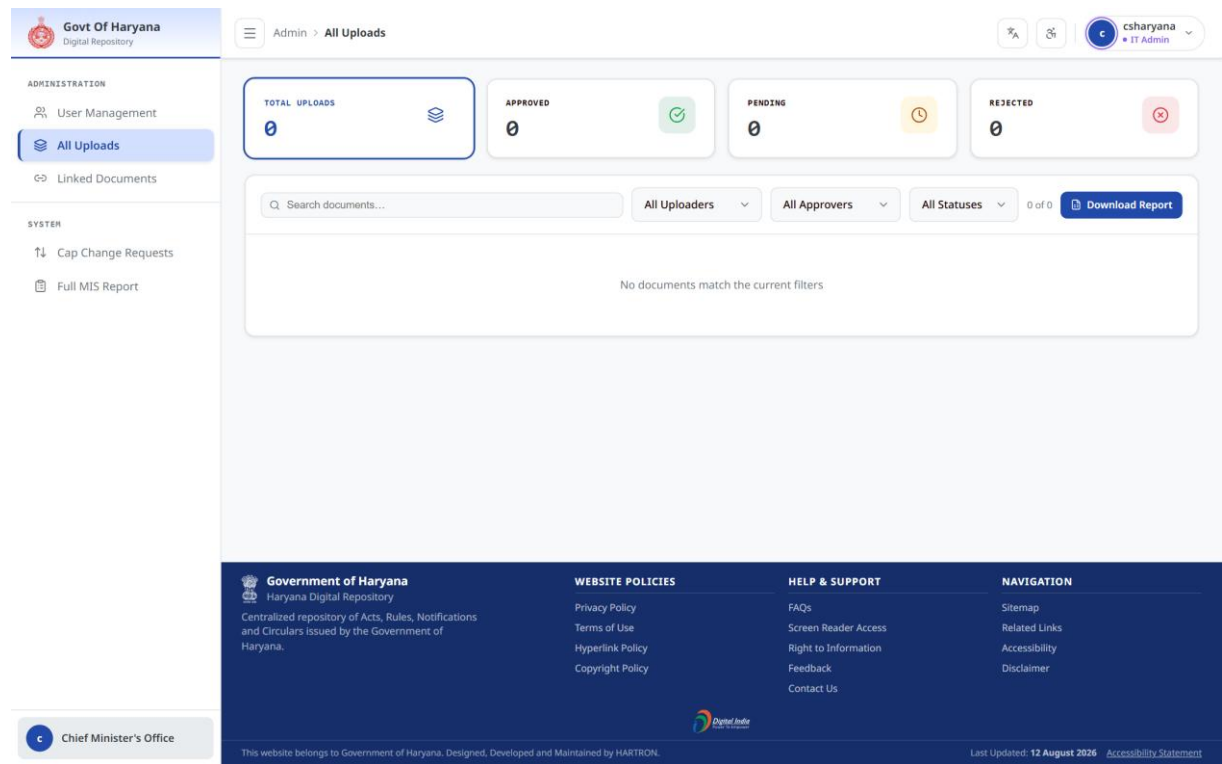

4. Deactivate / activate

The red/green icon on a row does the same thing as everywhere else in the app — a confirm dialog, then an immediate status flip, no page reload.

Section 3 — All Uploads

1. Documents from Admin's own department only

Stat tiles, search, filters, Download Report but every row belongs to Admin's own department.

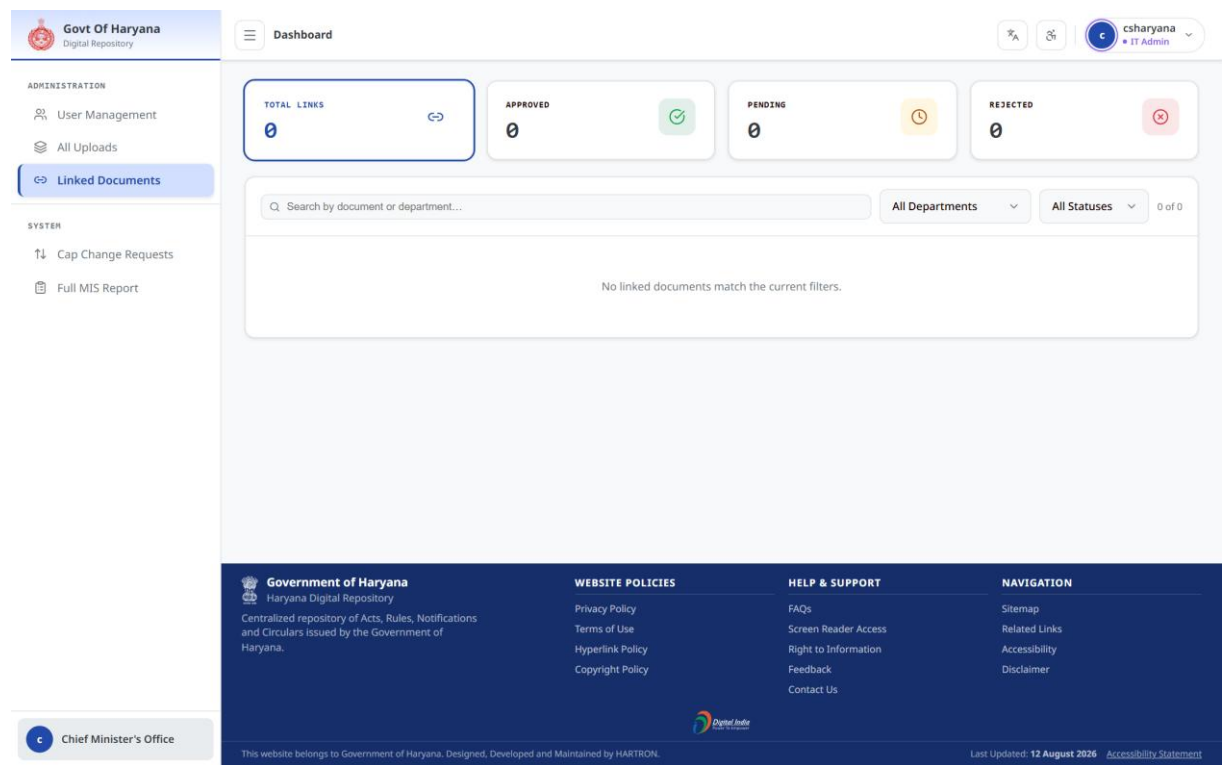

All Uploads, scoped to Admin's own department.

Section 4 — Linked Documents

1. Cross-department link requests involving Admin's department

Lists link requests where Admin's department is either the source or the destination — a monitoring-only view.

Linked Documents.

Section 5 — Cap Change Requests (Admin's own screen)

1. Submit a request

Pick a Role and a Requested Max Users value. The form shows the current cap for that role (a custom limit, or the system default) and how many users are already active in it — the requested number can't go below that. A Reason is optional but recommended.

The screenshot displays the 'Cap Change Requests' interface for the Government of Haryana. The sidebar on the left includes links for 'ADMINISTRATION' (User Management, All Uploads, Linked Documents) and 'SYSTEM' (Cap Change Requests, Full MIS Report). The top header shows the user 'csharyana' as 'IT Admin'. The main content area features four stat tiles: 'TOTAL REQUESTS' (0), 'PENDING' (0), 'APPROVED' (0), and 'REJECTED' (0). Below these is the 'New Cap Change Request' form, which includes a 'ROLE' dropdown, a 'REQUESTED MAX USERS' input field, and an optional 'REASON' text area. A 'Submit Request' button is located at the bottom right of the form. Below the form is a 'Request History' section, which currently shows 'No requests submitted yet.' The footer contains links for 'WEBSITE POLICIES', 'HELP & SUPPORT', and 'NAVIGATION'.

Cap Change Requests — stat tiles, the New Request form, and Request History below it.

2. Track the outcome

Request History lists every request Admin has ever submitted with its status (Pending / Approved / Rejected), the date, and any note left when reviewing it by the department.

Section 6 — Full MIS Report

1. Audit log, scoped to Admin's department

Search, Action filter, and a From/To date range - only actions relevant to Admin's own department appear here.
